

MAGNI

HEADPHONE AMP AND PREAMP

IN NORSE MYTHOLOGY, MAGNI WAS ONE OF THOR'S SONS.
THIS IS THE THIRD GENERATION OF OUR MAGNI. NO RELATION.
YES, WE KNOW, YOU'RE DISSAPPOINTED.
CONSOLE YOURSELF BY KNOWING YOU HAVE, BY FAR,
THE BEST AMPLIFIER ANYWHERE NEAR ITS PRICE.

OWNER'S MANUAL

GETTING CONNECTED

1 Connect your source to the Magni's "IN" RCA jacks with high-quality RCA cables. Or you can use crappy cables (but why?)

2 Connect the supplied wall-wart cable to the jack labeled "14VAC." Do not use any other wall-wart, or bad things might happen.

3 Optional: Connect the preamp outputs to powered monitors or an external power amp.

4 Turn on the switch. The protection relay will mute the output for 15-20 seconds, then it will engage with a click.

5 Select HI or LO gain, depending on your headphones. IEMs and earbud style headphones will probably need LO gain. If you don't have enough volume control range, use LO gain.

OPERATION

1 Connect your headphones to the headphone jack, marked with a headphone icon. For smaller headphone plugs, you may need a 1/8" to 1/4" adapter (not supplied.)

2 Turn the knob to control volume to both headphone and preamp outputs. We recommend you stop increasing volume before your headphones explode.

And that's it! Enjoy your music!

Note 1: when headphones are plugged in to the Magni 2 Uber, the preamp outputs will mute.

Note 2: Some headphones that use TRRS plugs (typically ones with microphones, designed for use with smartphones) may have problems with some 1/8" to 1/4" headphone adapters—use a specific TRRS-TRS adapter in this case.
